

BULLETIN: March 2007

**INFORMATION FOR
ARCHITECTS, ENGINEERS, THE DESIGN AND BUILDING INDUSTRY,
THE MEDIA AND GENERAL ENQUIRIES**

**Victorian Agent for exciting breakthrough paints
and coatings to cool our urban environment and
reduce energy bills by up to 50%!**

Mike Bailey Paint Services is the sole agent in delivering this outstanding Australian product to the domestic, commercial and industrial markets in Victoria.

Recent work completed by Mike Bailey Paint Services utilising these coatings includes:

Scienceworks - Melbourne

Shepparton Private Hospital

Goulburn Valley rural and domestic properties

Following years of testing, **Astec Paints** have introduced onto the Australian market **infrared heat reflective water-based acrylic paints and coatings** that prevent heat build up and can remain cool on all **exterior construction surfaces**. This is an exciting breakthrough product that changes much of the thinking associated with keeping properties cooler. To complement design and safety aspects, the colour range features more than 40 colours, which are light through to dark, with a minimum life expectancy of 15-20 years.

These products have earned the **ENERGY STAR logo** and meet very strict energy efficient and environmental guidelines. **Astec Paints** are the first in Australia to display the internationally recognised (EPA) **ENERGY STAR logo**. The Energy Star program is managed by governments in Australia and around the world. ie Australian Green House Office; Environmental Protection Agency, United States(E.P.A); Natural Resources Canada (NRCan); The European Commission (EC); The Energy Conservation Centre, Japan (ECCJ); and The Environment and Development Foundation, Taiwan (EDF).

Some key facts about Astec Paints and Coatings:

REDUCE AIR CONDITIONING SERVICES

REDUCE ENERGY BILLS BY UP TO 50%

CUT GREENHOUSE GAS EMISSIONS

ENERGY STAR labelled products translate into lower internal building temperatures and less urban heat build-up. Air conditioning power consumption is reduced along with green house emissions.

... If just one in ten people would choose ENERGY STAR labelled products it would cut greenhouse emissions by 7.72 Billion Kilograms.

Victorian Specialist and Agent

Mike Bailey Paint Services is proud to endorse, use and supply these products from leading South Australian paint and coatings manufacturer - **Astec Paints Australasia Pty Ltd** - manufacturers of premium range interior/exterior acrylic wall and alkyd trim products for the domestic and commercial markets. Alongside developing coating technologies to Australian Standards, they specialise in industrial primers, strippers, rust treatments, heat reflective “Energy Star” paints, exterior skim coats, texture finishes and elastomeric membranes.
